

SOHAN S PAGADE

Bangalore, India | sohanspagade@gmail.com | +91 7483448300 | github.com/Sohanspagade

PROFESSIONAL SUMMARY

Computer Science undergraduate (B.E., graduating 2027) with hands-on experience building full-stack and AI-enabled applications using Java, Python, JavaScript, React.js, Angular, TypeScript, Node.js, Express.js, Flask, Javalin, MySQL, and MongoDB. Strong foundation in object-oriented programming, data structures and algorithms, REST APIs, database design, authentication, debugging, Git/GitHub, and AI/ML application development. Experienced in building RAG and LLM-integrated applications, modular backend services, and responsive web interfaces. Seeking software engineering, AI/ML, or developer-infrastructure internship opportunities where strong programming, problem solving, and product engineering skills can be applied.

TECHNICAL SKILLS

Programming: Java, Python, JavaScript, TypeScript, SQL

Computer Science: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, REST API Design

Frontend: React.js, Angular, HTML5, CSS3, Bootstrap, Tailwind CSS, Responsive UI

Backend: Node.js, Express.js, Flask, Java Javalin, REST APIs, JWT Authentication, Role-Based Access Control

Databases: MySQL, MongoDB, MongoDB Atlas, Relational Database Design

AI/ML: Python, Pandas, NumPy, Scikit-learn, LLM API Integration, RAG, Prompt Engineering, NLP-based Recommendation Logic

Engineering: Git, GitHub, Postman, MySQL Workbench, VS Code, Debugging, API Testing, Code Review

PROJECTS

AI Public Service Assistant for Government Schemes June 2026 – Present

React.js, Tailwind CSS, Node.js, Express.js, MongoDB, LLM API, RAG, JWT

- Designed a full-stack AI assistant that matches users with government welfare schemes across 5+ categories using rule-based eligibility logic and 10+ REST API endpoints.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline over scheme documents to support personalized LLM responses and information retrieval.
- Built JWT authentication and role-based access control for an admin section and designed MongoDB schemas for scalable scheme lookup workflows.
- Integrated external government scheme sources into the application workflow to help keep eligibility and scheme information current.

SmartCart — Online Grocery Ordering Platform June 2026 – August 2026

Python, Flask, MongoDB Atlas

- Built an end-to-end e-commerce application with product catalog browsing, cart management, authentication, and order placement.
- Implemented REST-style backend routes with clean frontend/backend separation and modular application structure.
- Designed MongoDB Atlas collections for products, inventory, and orders and implemented order-processing workflows.

AI Study Planner — Full-Stack Project March 2026 – May 2026

React.js, Java (Javalin), LLM API, REST APIs

- Built an AI chatbot and career-path prediction feature using a Java/Javalin backend and React frontend for multiple study and career tracks.
- Exposed core functionality through REST APIs with separation of frontend, backend, and service responsibilities.
- Applied object-oriented programming and iterative development practices while learning and integrating new tools.

EXPERIENCE

Intern — Infosys Springboard — Sep 2025 – Dec 2025

- Completed structured coursework in Python, Java-based object-oriented software development, and AI/ML fundamentals.
- Applied debugging, data structures, OOP principles, and algorithmic problem-solving through hands-on exercises and mini-projects.
- Worked in a feedback-driven learning environment and strengthened practical software development fundamentals.

EDUCATION

Bachelor of Engineering (B.E.) — Computer Science & Engineering | 2023 – 2027

Don Bosco Institute of Technology, Bangalore | CGPA: 8.4

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

CERTIFICATIONS

Modern AI Masterclass — Infosys Springboard (Oct 2025) | DBMS & MS Fabric SQL — Udemy (Apr 2025) | Java Programming Certification (Apr 2025) | Python & AI/ML Fundamentals — Infosys Springboard

ADDITIONAL STRENGTHS

Software Engineering • AI/ML Applications • LLM/RAG Applications • Problem Solving • API Development • Database Design • Authentication & Authorization • Debugging • Version Control • Full-Stack Development • Technical Documentation • Collaborative Development
